Jagakarsa, South Jakarta, Indonesia

I'm a persistent Full-stack Developer. I enjoy solving problems and planning for the long term impact of developing an application. I also have strong ability to adapt easily when working in a team. After graduating from college, I decided to pursue a career in technology and tried to get really good at it by joining a coding bootcamp as a full-stack developer. I am currently a talent at PT DumbWays Indonesia Teknologi.

Education Level

PT. DumbWays Indonesia Teknologi - **South Tanggerang, Indonesia**   Nov 2023 - Present

Talent, Full-stack Developer

Prepared to become a competent programmer who is ready to work. Explore subjects related to web application development about approximately 4 to 5 months and then implement it on projects as well as sharpen soft skills, especially communication.

- Programming Language: Javascript, Typescript, Golang (exploring)
- Frontend skills: React, React-Native, Tailwindcss, Chakra UI, Redux-toolkit
- Backend skills: NodeJs, ExpressJs, Rest API, BcryptJs, JWT, PostgreSQL, MongoDB, Redis
- Additional skills: Git and Github

Universitas Pembangunan Nasional Veteran Jakarta - **South Jakarta, Indonesia**   Sep 2019 - Sep 2023

Bachelor Degree in Mechanical Engineering, 3.66/4.00

- As an HR member contributing to the recruitment of new members in the Society Of Renewable Energy Organization.
- Making a mango chip slicing machine and conducting machine counseling with lecturers in a mango producing area in Indramayu.
- Making a plastic waste recycling machine that will be used by lecturers for community service around campus.

Projects Experience

Portfolio

Website

My personal portfolio with Next ts, Tailwind css, and deploy on vercel

- Link: https://portfolio-dipagalatian.vercel.app/
- Technology: Next.js, Typescript, Tailwindcss
- Duration: The website development process takes about 1 to 2 days until the deployment stage.

D'World App

Social media application

D'World app is a website-based social media application inspired by the application thread. The main feature of this application is that users can share images and text with other users. Users can also comment and like other users' posts, and of course can follow other users to make friends.

- Technology: React, Typescript, Chakra UI, Redux-toolkit, Express.js, PostgreSql, Bcrypt, JWT, Typeorm
- Common fitur: Post image and text, follow user, search user, edit profile, like, comment, login, and register
- Duration: The website development process takes about 3 to 4 weeks.

Additional Skills

- **Hard Skills**: Git and Github
- **Soft Skills**: Good communication, Team work, Creative, Adaptable, Self-confidence, Critical thinking, Problem solving, Ambition to grow.
